

Integrated Friction / Vacuum Feeder

For Printing & Inspecting

Feed Flat Cartons & Blisters Cards

The Integrated Friction / Vacuum Feeder is ideal for feeding flat cartons, blister cards, Tyvek bags/sheets and credit cards. Products are manually loaded into the infeed magazine which automatically denests product onto a friction / vacuum belt drive for printing and/or inspecting. This motion provides highly accurate and constant motion for the highest of print quality. The Integrated Friction / Vacuum Feeder can be equipped with most printers, label applicators or vision inspection systems.

Options:

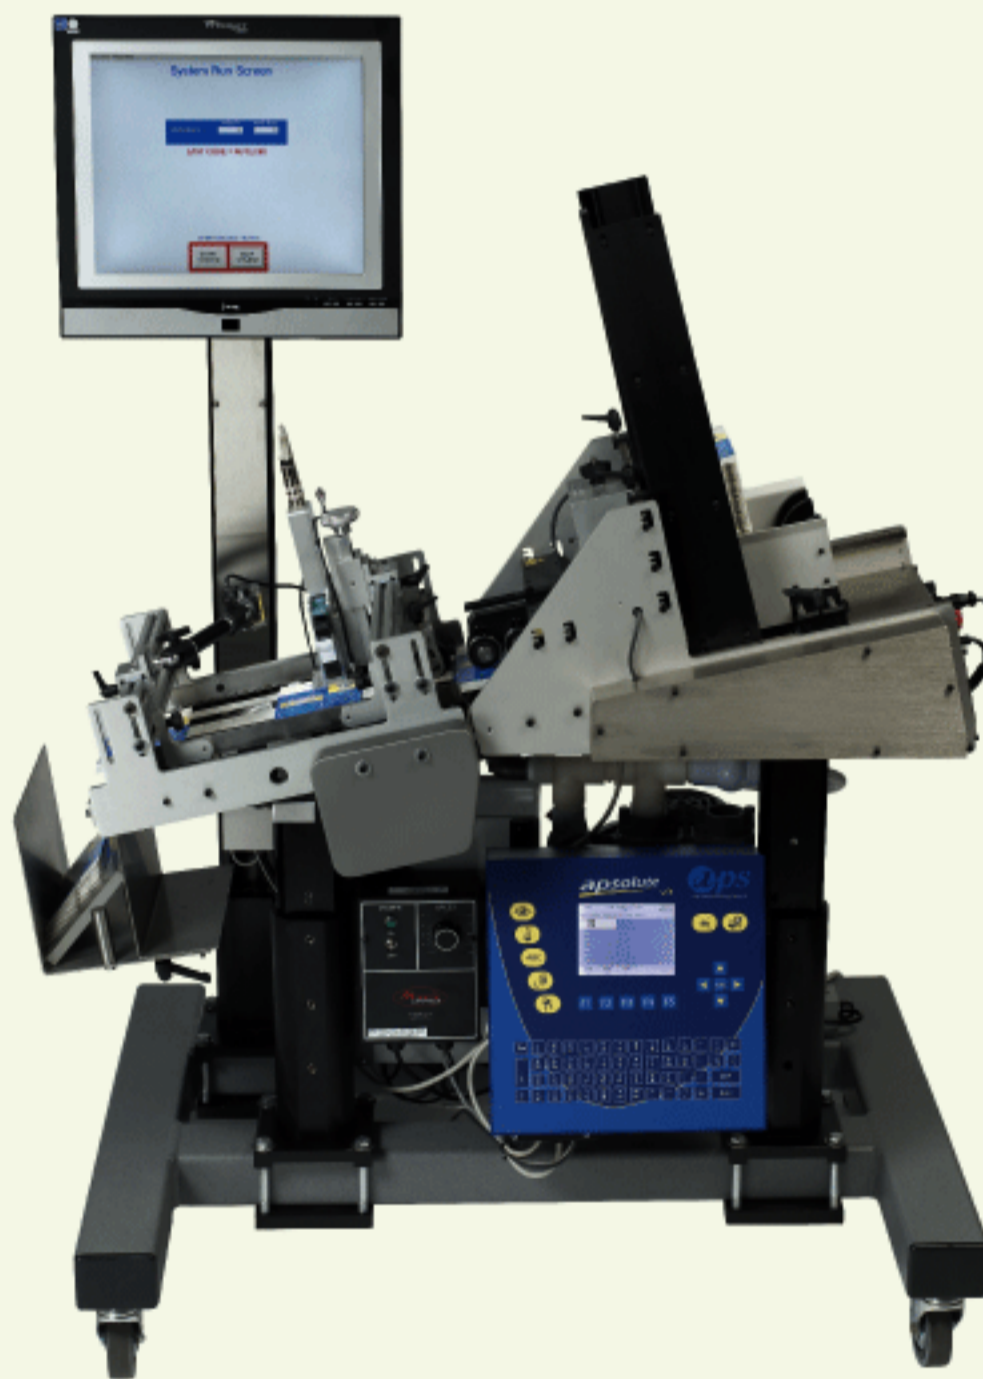

- Shingling outfeed conveyor
- Inkjet or Laser printer
- Label applicators
- Vision inspection system
- Thermal transfer system
- Shaft encoder
- Reject station
