## Twin Belt Diverter Unit

Conveyor mounted Twin Belt Diverter Unit for accessing underside of containers for bottom ink jet coding applications. The unit is designed to be used when it is not convenient to create a break in the line and can be easily mounted to most conveyors. Adjustments for varying container sizes takes only minutes. Variable speed synchronized drive ensures correct speed matching.

Applications include:

CIJ Ink Jet Printers

Laser Marking

Inspection

Main Features:

Mounts directly to your existing conveyor

Stainless Steel Construction

Variable speed DC Controller

Optional print head mounting bracket

Quick changeover / no tools required

Throughput: Up to 150 ft/min

Size Range: Containers up to 125mm across

Approximate dimensions: L 550mm; W 400mm; H 450mm

Power Requirements: 110/220/240V AC Single Phase Supply, 2.0 kW Loading
